

GTS – color chart

Approximate color-obligation:

The shown colors for the leather and imitation leather covers are not obligatory to 100% because of technical reasons. But you can use them to imagine the color. **At your request we send you an original pattern.**

Colored stitches:

Besides the colored covers you can, of course, choose colored stitches (SF) and material for the borders (FSK), too. The Stitches or material for the borders can match with the cover or purposely differ from the cover to contrast with it. (Please specify your choice in your order.)

You can find design examples in the design overall view of GTS.

Surface-structure:

Either leather or imitation leather covers show the usual leather-structure. Beyond it we have covers with special patterns like "Tundra-Tec-Character", "Weave-pattern" or "Carbon-Character". More Special-Charcters and exotic leather like ostrich, reptile etc. by inquiry.

Kunstleder		Best.-Nr.	Echtleder		Best.-Nr.
